

EVEN

or

ODD?

It's good for your yard!

And it's good for our community.

City Utilities of Springfield is asking all of its customers who water their lawns—whether you use an irrigation system or sprinklers—to do so on designated days of the week, based on your house number. Why?

Save water and money

With your help, Springfield may be able to save 5 million gallons of water every day, preserving one of our most precious and valuable natural resources. We need water to live, so let's all use it wisely. Plus, by saving that much water—enough for 17,000 homes—expensive projects like a new water treatment plant, necessary to serve customers with drinking water they need, may be delayed further into the future.

It's simple to do. Check your house number. Even or odd?

▶ If your house number is even...

If your house number ends in an even number, like 532, 1298, or 4266, water only Wednesday, Friday and Sunday.

▶ If your house number is odd...

If your house number ends with an odd number, like 531, 1299, or 4267, water on Tuesday, Thursday and Saturday.

▶ What about Monday?

We all take a break—no watering on Monday. But, our yards will still receive enough water to keep them healthy and attractive. Typically, even in dry and hot conditions, it is not necessary to water every day.

Save water. Save money.
Help our community.
