

Looking for other ways to lower your energy costs?

City Utilities offers rebates to help.

Programmable Thermostat Rebate

City Utilities' customers can receive \$15 back on the purchase of qualifying programmable thermostats that automatically adjust temperature settings, allowing customers to save energy during periods it is not needed.

Residential Insulation Upgrade Rebate

Making sure a home's insulation level is adequate keeps heated or cooled air in the home and reduces air infiltration. To help make customer insulation upgrades affordable, CU electric and natural gas residential customers are eligible for a 20% rebate, up to \$300, of the total cost of insulation upgrades.

Efficient Toilet Rebate

City Utilities' water customers who replace existing toilets are eligible for a \$50 rebate after the purchase and installation of an ultra low-flow toilet, or a \$75 rebate after the purchase and installation of a WaterSense® labelled high-efficiency toilet. For new homes and businesses under construction, customers who choose the high-efficiency toilets are eligible for the \$75 rebate.

ENERGY STAR® Heating and Cooling Rebates

City Utilities' residential, multi-family and residential new construction customers who purchase and install high-efficiency heating and cooling systems can qualify for cash-back rebates based on the efficiency of the units they install:

- ENERGY STAR® Central Air Conditioner Rebate
- ENERGY STAR® Natural Gas Furnace Rebate
- ENERGY STAR® Air-Source Heat Pump Rebate
- ENERGY STAR® Geothermal Heat Pump Rebate
- Pre-season HVAC Tune-up

To find more information about these rebates and other cash-back incentives to help improve the efficiency of your home, call CU at **874-8200 or visit cuenergywise.com.**

HomeSense Energy Audit

With fall here, it's time to get your home ready for winter weather. A HomeSense Energy Audit from CU will help you get started. With the HomeSense Audit, a qualified energy auditor will evaluate your home to find areas where energy and water is being wasted—and identify how to make your home more energy efficient, while saving you money.

In addition to a diagnostic evaluation of your home's energy and water efficiency, you will be provided with a detailed report outlining cost-effective measures specifically for your home. You'll also receive an EnergyWise Efficiency Kit with over \$40 of energy and water efficiency items:

- **3 compact fluorescent lights**
- **A water heater insulation blanket**
- **A kitchen faucet aerator**
- **A low-flow showerhead**
- **A package of outlet & switch plate insulation gaskets**

The HomeSense Energy Audit, normally \$350, is available to all CU customers at a low cost of \$175 and can be divided into four convenient installments on your utility bill.

Call **874-8200** today to schedule an appointment.
