

Initiate Closure (Dec-2015)

JTEC

Notice-This serves as notice of intent to initiate closure of the inactive (no longer received CCR after October 14, 2015) CCR surface impoundments at John Twitty Energy Center in accordance with section 257.100(c)(1).

Narrative-The closure will be accomplished in accordance with 257.100(b)(5). The CCR SI will be closed by removing CCR. CCR removal and decontamination of the CCR SI will be complete when all CCR is removed including any liner. This will be accomplished by excavation of ash and or liner, and transporting the excavated material to the onsite permitted landfill. This will be followed by appropriate testing to document completion of closure.

Schedule-The work will occur in sequence between January of 2016 up to and including April of 2018.

Feasibility-The closure is technically feasible within the time frame specified in 257.100 (b).

JRPS

Notice-This serves as notice of intent to initiate closure of the inactive(no longer received CCR after October 14, 2015) CCR surface impoundments at James River Power Station in accordance with section 257.100(c)(1).
