

## Contemporaneous Disclosures

In accordance with its Standards of Conduct Implementation and Compliance Procedures, City Utilities of Springfield, Missouri will post any non-public Transmission Function information that was disclosed to any Marketing Function Employee. If CU, in its role as a transmission provider, discloses non-public transmission customer information, critical energy infrastructure information (CEII), or any other information that is subject to limited dissemination, CU will post notice of disclosure on this page. (The non-public portion of the information will not be posted.)

### Disclosures:

Date	Disclosure
January 24, 2013	On November 13, 2012 the Southwestern Power Administration (SWPA) gave notice to CU of its intent to terminate service and open a 69 kV point of interconnection between SWPA and CU at the Golden Substation on June 1, 2013. On January 15, 2013 a CU marketing-function employee was informed of a transmission-function employee's recommendation to seek and execute a letter agreement with SWPA terminating the existing interconnection agreement and opening the tie at Golden Substation on February 1, 2013. The CU transmission-function employee's recommendation was also forwarded to a group including a different CU marketing-function employee on January 18, 2013. CU's marketing-function employees took no market action based on this information.
