Winter Average (WA)

- (a) *For existing permanent and temporary services:* The WA shall be the average of the billed monthly usages for the most recent and complete billing months November through May, rounded to the closest whole CCF. In determining WA, prorated months, months with less than one complete month of service, months prior to the initiation of service, and months with services discontinued due to non-payment shall not be included in the WA calculation.
- (b) *For new permanent and temporary services, without at least one complete billing month among the most recent November through May billing months:* Initially, until a Winter Period usage occurs, the WA shall be the highest billed monthly usage, rounded to the closest whole CCF. Once an actual billed monthly usage (not an estimate) is available for a complete November through May billing month, WA shall be the same as defined for existing services, paragraph (a). *Temporary services served from permanent service equipment, which may be disconnected during portions of the year, are seasonal services, instead of temporary services, with WA determined by paragraph (c).*
- (c) *Services which have been temporarily discontinued for more than 24 hours due to a customer's request, and then reconnected prior to twelve months, and which are without at least one complete billing month among the most recent November through May billing months:* The WA shall be the average of the most recent and complete November through May billed monthly usages, rounded to the closest whole CCF, setting the usage at zero for each and all months during which any portion of the month service was disconnected. This paragraph (c) is also applicable to *seasonal services, and recurrent temporary services, approved by the President-CEO without complete usage history during at least one of the most recent November through May billing months.*

Outside City Charge

All charges shall be ten percent (10%) more per service outside the corporate limits of the City of Springfield, Missouri.
